marcus.vance.dev@example.com | +1 (555) 678-9012 | Atlanta, GA

PROFESSIONAL SUMMARY

Backend Software Developer with 6 years of expertise building robust web services, database architectures, and asynchronous message processors. Strong focus on Python backend engineering, PostgreSQL schema design, SQL query tuning, Docker containerization, and Kubernetes cluster orchestration.

TECHNICAL SKILLS & COMPETENCIES

Python, SQL, PostgreSQL, Docker, Git, Kubernetes, Linux, Redis, Flask

PROFESSIONAL EXPERIENCE

Senior Backend Developer - Nexus Web Systems (2020 - Present)

- Developed microservices in Python utilizing Flask and PostgreSQL for core transaction flows.
- Containerized backend applications with Docker and deployed workloads onto Kubernetes clusters.
- Engineered high-performance relational database schemas and executed complex SQL queries.
- Maintained continuous integration workflows and managed branch deployments via Git.

EDUCATION

Bachelor of Science in Software Engineering, Georgia Tech
